

Calculators provided through the Prometric Software

There are 2 tabs, FDP Candidates have access to both calculators

Tab 1: Basic Calculator

Tab 2: Scientific Calculator

SCIENTIFIC CALCULATOR USER TIPS:

Click on the Calculator icon to launch it. Use the scientific version to make the following calculations and verify (e.g., using Excel) that you have received the correct answers:

Multiply 5 by the natural log of 3

1. Raise 1.5 to the power of 2.5
2. Work with memory functions by saving and retrieving the results (note that the copy function can be only be used to paste the answer in your exam).
